Redefining it, managing it,

Taking care of it, so you can take care of your business

Agility360 is an innovative managed IT service, which keeps your business safe, secure, and compliant.

We are dedicated to understanding the industry, enhancing our knowledge, and successfully delivering the IT solutions your business needs.

Continuously building on our expertise, partnerships, and assets, to provide a tailored service, which supports your business.

Providing trusted, reliable IT systems and services, which offer peace of mind and free up more time for you to focus on the development and growth of your business.

We are a SaaS and managed IT service provider, delivering customer-focussed solutions and services. We work with you to provide business value that aids the growth and development of your organisation, services, and people.

With technology and IT forming the key infrastructure for all businesses, we specialise in providing IT support and developing software for the evolving digital environment.

Our team of IT experts and developers, alongside our proven experience, allows us to provide a value-enhancing service, driven by collaboration with our clients .

Our approach centres on understanding an organisation, it's positioning - where they are now and where they want to be and providing the systems and software that support them in achieving their goals.

Our in-depth understanding of the industry, extensive experience, and straightforward approach, ensures the successful delivery of IT solutions which suit your business needs.

Let's do it

Managed services, consultancy, application and software development

Tailored and flexible support

- » Direct access to the remote IT team
- » Dedicated on-site resource
- » Timed to suit your business
- » Flexible monthly or annual contracts

A range of flexible services, to ensure your technology is running smoothly, giving your business a streamlined and happy team.

We understand that no two businesses are the same and will collaborate with you to identify exactly what is required and how we are best placed to support you.

Offering your business choices, from remote management, using our team of highly competent technicians, to a committed, experienced technician in-house.

Based around the hours which suit your business, from 24/7 to specified times.

ITIL process aligned whilst always adhering to best practices, sitting alongside industry-leading systems and tools.

With our personalised service, you are always in safe hands, including a direct point of contact and your procurement portal.

Software licensing

Well-established relationships with leading software and antivirus suppliers, offering reassuring cutting-edge solutions.

Access to highly competitive licenses, or new subscription cost options, which provide the best value to suit your business needs.

Dual protection, which works seamlessly together and is guaranteed to remain secure for the lifespan of your technology.

We are Microsoft Partners and Anti-virus Industry Leaders

Cloud Services

- » Data and application backup
- » Azure support applications
- » AWS pay-as-you-go platform
- » Google infrastructure

Store and back up your data reliably and securely in the cloud.

Taking appropriate measures to insure against loss, by using our trusted partner services to facilitate fully managed cloud backup of M365, and Google-hosted data.

The help you need to safely move VM software applications to hosted serverless models; Azure, AWS, and Google.

Engineering teams with the know-how to guide you through all updates and operational changes.

Bringing you a delivery model which equips you with scalable platforms, using the most up-to-date IT solutions.

Cyber security

- » Industry-certified and accredited
- » Proven pen testing
- » Enhanced endpoint security

Industry-certified and accredited, with a proven track record of effectively dealing with potential threats to your computer systems.

In-depth pen testing, to identify areas of instability and provide tangible solutions, which safeguard your business.

Securing entry and endpoints of all user devices, to make sure you are protected from all unwanted activity.

Hardware and communications

- » Supporting network requirements
- » Overseeing IT hardware
- » Remain secure with Mobile Device Management (MDM)

Our accomplished team of IT engineers are on hand to take care of your network requirements, from cabling to switches, we have the experience to back you up.

Supply of all IT hardware, alongside full asset management, is simply handled through your tailored online portal.

Stop breaches to laptops, mobiles, and procurement using our MDM service. Offering up-to-date security, and installation of approved software, with users only accessing approved data, all managed through our tried and tested online platform.

Professional Services

- » Audit, Gap Analysis, Remediation, Transformation
- » Onboarding
- » Consulting
- » Training
- » Project Management
- » Engineering
- » Development
- » Temporary Labour
- » Interim Management

We are here to help your business to deliver, whether it's the management of a project, implementing a strategy, or sourcing first-class technology at the right price.

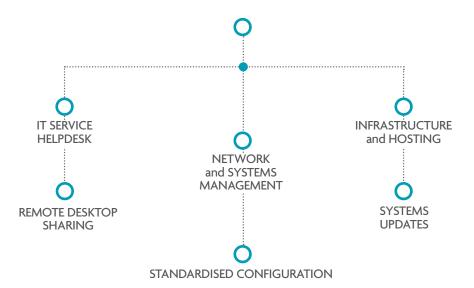

Everything we do is focused on successfully streamlining your IT, and making positive improvements, which directly support the development and growth of your business.

Whatever your IT needs, we have *it* covered.
