

The background of the slide is a photograph of a construction site, featuring a large crane and various construction materials. The entire image is covered with a semi-transparent blue overlay. The text 'FATIGUE360' is repeated three times in a large, bold, sans-serif font. The first two repetitions are in white, and the third is in a dark blue color, matching the overlay. The text is positioned in the lower-left quadrant of the slide.

Ensuring industry compliance with
a user-friendly, three step process

A fatigued workforce is less productive, more costly and will put themselves or others at risk. Fatigue360 is the solution

FATIGUE360 ensures applies a three step process, ensuring industry compliance. New regulations within the rail and construction industries encourage managers and site staff to ensure a proactive management and mitigation of fatigue.

STEP ONE

Fully compliant with HSE fatigue and risk scoring, our platform gives you the facility to set trigger points for on site activities which put individuals at risk of fatigue. As an example, one trigger point under the new NR/L2/OHS/003 regulations is when an individuals commute and working time totals or surpasses 14 hours a day.

STEP TWO

Once an employee has surpassed one of the triggers, a line manager must assess the risk of fatigue to the employee.

STEP THREE

A tailored fatigue management plan must be designed for the individual to assess how employers can reduce the risk of fatigue, this may include implementing strategies, such as staggering shifts.

So, Fatigue360, what will it do for me, how will my business benefit?

FATIGUE360 is fully developed as an end-to-end fatigue risk management and job planning tool. FATIGUE360 enables planners, schedulers and rosterers to monitor fatigue in their workforce. This unique system allows all business operations to plan and manage not only working hours, but also the travel and rest periods around work shifts.

Our FATIGUE360 platform is very user-friendly, providing a significant return on investment and is proven to reduce incidents while offering increased productivity.
