

The background is a photograph of a construction site, showing scaffolding, structural elements, and various construction materials. The entire image is covered with a semi-transparent red overlay. The text 'OBSTRUCTION360' is repeated three times in a large, bold, sans-serif font. The first two instances are in white, and the third is in black.

# OBSTRUCTION360 OBSTRUCTION360 OBSTRUCTION360

**Managing site behaviours, reducing costs and delays**

# So, if obstructions on your worksites are the problem, Obstruction360 is the solution

For worksites to be safe and productive, onsite obstructions must be identified and mitigated as quickly as possible. Ignoring obstructions not only increases the risk of an incident or a health and safety breach, they can also negatively impact the programme performance and delivery of a construction project.

Our **Obstruction360** technology provides worksites with a systemised, realtime approach to removing onsite obstructions. By developing its' use across an entire worksite and supply chain not only enhances the safety and efficiency of the site, it also works to educate the workforce.

The system provides clarity, justification, and evidence as to why a notice has been issued, providing the supply chain with the reasons they have been penalised. This information can be applied to inform their 'lessons-learned' promoting better behaviours and working practices within their organisation.

The data and information captured from **Obstruction360** can also be shared amongst the supply chain to demonstrate the benefits the technology is having on the performance on the worksite. Collating and sharing this information can further support improved behaviours throughout the supply chain, creating further site efficiencies and improvements.

**ACCOUNTABILITY**  
Track all obstruction notices, categorise the risk and time for rectifications and calculate the cost to clear.

**NOTIFICATIONS**  
Notify any trade contractor that an obstruction notice has been recorded against them.

**WORK ALLOCATION**  
Allocate resources to remove the obstruction.

**WORK MONITORING**  
View and track, in real-time, the process of removing site obstructions.

**HARM PREVENTION**  
Prevent site accidents by identifying obstacles causing obstructions

# So, Obstruction360, what will it do for me, how will my business benefit?

The immediate benefits of **Obstruction360** are that it provides worksites with a data-driven solution to the production and rectification of onsite obstructions, promoting better site safety, performance, and productivity.

This combined with the long-term benefits of an educated and informed supply chain will ensure that better behaviours and working methods will be adopted and introduced across the site, promoting a culture and environment of continuous improvement and best practice.

**Productivity**, a reduction in lost work days by creating a safer working environment and mitigating risks.

**Data-driven innovation**, performance management of trade contractors in relation to open and closed obstruction notice data.

**Account management**, accurately attribute incurred clearance charges to the correct trade contractors.

**Tech led**, the mobile app applies automation and technology, to capture and correct in real-time.
